“The stakes are extremely high,” stated John O’Brien, EDUCAUSE president and CEO. “The context is change, and the challenge is that higher education is an organization known for its timeless values, not its turning radius. We need change-open and change-driven leaders to reimagine and reinvent our institutions and the role they play in our communities for all stakeholders. Our leaders have to be courageous risk-takers who ALSO understand how change is experienced emotionally across our organizations.”

What changes are in the foreseeable future for CUNY, and more specifically, for Hostos Community College? As leaders of departments, the panelists will share invaluable insights about future directions and how they have addressed changes impacting their department and the College. In connecting and extending the conversations started at this semester’s colloquia, the panelists will share how they promote and embrace “change in a changing world.”
